Annual Budget

(a) Executive Mayor's Speech

The Executive Mayor's budget speech is attached as Appendix 1 to this agenda.

(b) Council Resolutions

The Council take note of the following resolutions for the annual budget of 2020/21 to 2022/23 financial period:

The Council of Moqhaka Local Municipality, acting in terms of section 24 of the Local Government: Municipal Financial Management Act (Act 56 of 2003) tables the budget for the 2020/21 MTREF.

The annual budget of the municipality for the financial year 2020/21 and the multi-year and single-year capital appropriations as set out in the following tables:

- i. Budget Summary as per Table A1.
- ii. Budgeted Financial Performance as per Table A2,
- iii. Budgeted Financial Performance as per Table A3,
- iv. Budgeted Financial Performance as per Table A4,
- v. Multi-year and single-year capital appropriation by municipal vote and standard classification and associated funding by source reflected as per Table A5,
- vi. Budgeted Financial Position as per Table A6,
- vii. Budgeted Cash Flows as per Table A7,
- viii. Cash Backed reserves and accumulated surplus reconciliation as per Table A8,
- ix. Asset Management as per Table A9,
- x. Basic Service Delivery measurement reflected as per Table A10.

1. Executive Summary

1.1 Introduction

The application of sound financial management principles for the compilation of the Municipality's financial plan is essential and critical to ensure that the Municipality remains financially viable and that municipal services are provided sustainably, economically, equitably and efficiently to the community at large. The Municipal Budget and Reporting Regulations, as well as various circulars as issued by the National Treasury has been used as a guiding tool for the budget preparation by Local Government.

The National Treasury's MFMA Circulars No.98 and 99 were used to guide the compilation of the 2020/21 MTREF.

The compilation of the MTREF remains a significant challenge to balance the budget between the limited revenue resources available and the immense need to provide quality basic service delivery to our community. Tariff increases must be limited to be within the affordability levels of our community and must still promote economic growth and to ensure financial sustainability the tariffs must be cost reflective.

The municipality's financial health position continues to deteriorate and as such needs to be stabilised and to strive to continuously better its financial position, complimented by acceptable levels of service delivery at affordable tariffs. The retention/maintenance of sufficient cash-backed reserves is critical for the sustainability of the municipality. In the present current economic climate, municipalities cannot afford to provide municipal services without recovering the cost of providing these services.

The National budget is under severe financial strain, as only 48.2% of the nationally raised funds are allocated to national government, 43% to Provinces, while municipalities (local government) only gets **8.8%** of the <u>national revenue share</u>. The National budget resulted in a decline in the funds allocated to local government, which resulted in a decrease of 9.1% when compared to the 2019/20 financial year.

1.2 Economic Overview

The national economic outlook has weakened since the 2019 MTBPS, following lower-than-expected growth in the second half of the year. Real GDP is estimated to have grown by only 0.3 per cent in 2019, partly as a result of electricity supply failures. Weak growth translated into a record unemployment rate of **29.1 per cent** in the second half of the 2019.

The national economic growth projections have been revised down to 0.9 per cent in 2020, rising to just 1.6 per cent in 2022. Electricity shortages are expected to constrain the economy over the forecast period. Global growth is expected to rise moderately over the forecast period, but considerable downside risks remain. The outlook for South Africa's key trading partners has weakened in recent months.

The following macro-economic forecasts have been taken into consideration during the preparation of the 2020/21 MTREF.

Macroeconomic Performance and Projections

Percentage change	2019	2020	2021	2022
	Estimate		Forecast	
Real GDP growth	0.2	-7.2	2.6	1.5
CPI Inflation	4	4	3.9	4.4

The economic impact of **Covid-19** [The National Disaster] remains unknown, as most people has lost employment mainly due to a number of companies closing down as a result of lack of economic activities. The economic pressures are still unknown, despite the fact that it will be strongly felt by the local government (municipality) in terms of non-payment of municipal services which in turn threatens the financial sustainability of municipalities.

The lack of business confidence and private investment in the local government, has seen municipalities resorting to extreme measures to obtain funding which in turn increased the cost of raising debt due to the high risk of non-payment of financial obligation.

The latest S&P Global Rating of South Africa's long term foreign and local currency debt ratings further into non-investment grade to 'BB-' and 'BB' respectively. This adversely affect not only the Country's ability to raise debt, but also affects the municipality's ability to access finance. The rating adds with it more costs of doing business as a result of increased cost of debt (Interest).

The Economic Impact of Eskom supply disruptions

Eskom, which has a near monopoly on South Africa's electricity supply, is taking a large toll on the economy.

Industry estimated that power cuts caused losses of about 0.1 per cent of GDP in the fourth quarter of 2019. However, without intervention, the impact of supply disruptions on growth will be greater in 2020. Power cuts — even scheduled one restrict production and investment, lower trade, increase the cost of doing business and put pressure on profits and employment. This in turn tends to reduce technology uptake and modernisation, particularly in small businesses. An uncertain and declining supply of electricity also contributes to low levels of confidence and investment, as well as lost capacity due to dame from power surges. The size of Eskom's balance sheet and its dominance in the energy sector affect the cost of borrowing for government, which in turn affects the cost of borrowing for the entire economy. Taken together, these factors structurally low South Africa's competitiveness, employment and exports.

*** Source: NT 2020 Budget Review

In terms of guarding against these negative effects on the local economy, the municipality is on a drive to mobilise a private equity investor to partner with in the resuscitation of the municipality's Power Station into a cleaner energy source which will results in lower output costs for electricity consumed. This will aid in the reduction of the current Eskom debt and a relief from the high tariffs charged by Eskom which have become unaffordable to local government, as evidenced by the majority of municipalities which are indebted to Eskom.

The legislation governing local planning and budgeting emphasises community participation in decision-making. The partnership between municipalities and communities relies on the public recognising the value of, and paying for, municipal services. Over the medium term, equitable share allocations, which fund free basic services for low-income households, grow faster than inflation to account for household growth and higher costs of services. But, for most municipalities, own revenues are a larger proportion of their funding than transfers. Their sustainability depends on how they collect and spend their own revenues.

Problems in revenue management are the largest contributor to financial distress in local government. Households, followed by commercial customers and government, owe the largest share of outstanding municipal revenue. Weak revenue collection affects payments to suppliers and the sustainability of services, which ultimately cast a significant doubt on the municipality's ability to continue as a going concern.

1.3 Budget Overview

There are three budgets tabled for approval by Council, the operating expenditure budget, the operating revenue budget and the capital budget.

Table 1 Consolidated Overview of the MTREF

R thousand	Adjustment Budget 2019/20	Budget Year +1 2020/21	% Increase/ (decrease)	Budget Year +2 2021/22	% Increase/ (decrease)	Budget Year +3 2022/23	% Increase/ (decrease)
Total Operating Revenue	869 795	932 728	_7%	977 499	5%	1 024 419	5%
Total Operating Expenditure	855 911	914 370	7%	958 260	5%	1 004 256	5%
(Surplus)/Deficit for the year	13 884	18 358	32%	19 239	5%	20 163	5%
Total Capital Expenditure	79 188	81 653	3%	85 573	5%	89 680	5%

The total operating revenue for the 2020/21 financial year has been forecasted at **R933** million. When compared to the 2019/20 Adjustment Budget, operational revenue has experienced a grown of 7%. For the two outer years, operational revenue is anticipated to increase by 4.8% and 4.8% respectively.

The total operating expenditure for the 2020/21 financial year has been forecasted at R914 million. When compared to the 2019/20 Adjustments Budget, operational expenditure has been projected at 7% in the 2020/21 budget year and by 4.8% and 4.8% for each of the respective outer years of the MTREF. The anticipated surpluses to be raised will be used to predominantly fund capital expenditure and to further ensure cash backing of funds and reserves.

The capital budget amounts to **R82** million for 2020/21, which is a <u>R3 million</u> (4%) increase from 2019/20 Adjustment Budget. This was mainly cause by the additional funds received for the Water Services Infrastructure Grant and the MIG Grant, and also a decrease with regards to the Own Funding Capital. The capital budget will mainly be funded from grants over the MTREF with gazetted grants of **R64** million as per the Division of Revenue bill 2020/21 and **R18** million from the municipal own funding.

2. The following budget principles and guidelines directly informed the compilation of the 2020/21 MTREF:

- The 2019/20 Adjustment Budget priorities and targets, as well as the base line allocations contained in that Adjustment Budget were adopted as the upper limits for the new baselines for the 2020/21 annual budget;
- The Zero-based budgeting methodology was adopted in the compilation of the Capital Budget;
- The Tariffs and Property Rates increases should remain affordable and should generally not exceed inflation as measured by the CPI year on year, except where there are price increases in the inputs of services that are beyond the control of the municipality;

- Tariffs need to remain or move towards being cost reflective, and should take into account the need to address the infrastructure backlogs and maintenance thereof;
- The necessary grants to the municipality are reflected in the national and provincial budget and have been gazetted as required by the Annual Division of Revenue Act.

3. Tariff Setting

There are several tools available and methodologies employed to determine the appropriate tariffs. The municipality may favour different approaches but the principles of tariff setting is consistently applied. The municipality considered the following practicalities when setting tariffs:

- The Costs of bulk purchases (Electricity & Water) and the fluctuation in the seasonal cost {time-of-use-tariffs} thereof;
- o The Consumption patterns to enable better demand management and planning; and
- o In the event that the municipality has been under recovering costs, embark on a process to correct the tariff structures over a reasonable time period so that cost reflective tariffs are phased in, in a manner that spreads the impact on consumers over a reasonable period of time.

The tariff setting process is reliant on sound baseline information such as the number of properties within the municipal area of jurisdiction, the values of these properties, the number of households identified as indigent/poor, the consumption patterns in respect of basic services and the growth patterns within the various geographic areas.

The inflation rate forecasts as per the MFMA Circular no. 98 issued by National Treasury has been used in compilation of the MTREF. The maximum of 6% growth rate was pronounced on the Revenue tariffs increases. However, some tariffs are higher than the stipulated percentage as these are based on recovering the cost of delivering the respective services and ensuring that the municipality remains sustainable.

4. The Council of Moghaka Local Municipality, acting in terms of Section 75A of the Local Government: Municipal Systems Act (Act 32 of 2000) tables the following tariffs as set out and included in the budget documentation, with effect from 01 July 2020: (Average Increases)

The proposed revisions to the tariffs have been formulated in accordance with the municipality's Tariff and Rates Policy and complies with Section 74 of the Municipal Systems Act as well as the recommendations of the National Energy Regulator of South Africa (NERSA). In terms of Section 75A of the Local Government Municipal Systems Act, any fees, charges or tariffs which a municipality may wish to levy and recover in respect of any function or service of the municipality, must be approved by a resolution passed by the municipal Council with a supporting vote of a majority of its members.

Description	2018/19	2019/20	2020/21	2021/22	2022/23
Property Rates	6%	9%	4.6%	9%	9%
Electricity	6.84%	9.41%	6.22%	5.2%	8.9%
Water	10.5%	6%	9.8%	8%	8.5%
Sanitation	10%	6%	5.4%	7.5%	7%
Refuse	9%	6%	8.3%	7%	6.5%
Other Income	6%	9%	11%	9.5%	8%

^{*} Electricity tariffs is as per the National Energy Regulator of South Africa (NERSA) approval.

The Council, in compliance with Section 14 of the Local Government: Municipal Property Rates Act, 2004 notes and tables to Council for approval the property rates increases as set out as per the tariff list attached as **Annexure F.**

5. The main challenges experienced during the compilation of the MTREF can be summarised as follows:

- The ongoing economic difficulties in relation to the national and local economic growth;
- The aging water, roads, sewer and electricity infrastructure;
- The need to reprioritise projects and expenditure within the existing resource basket given the cash flow realities and declining cash position of the municipality coupled with the ongoing increase of the municipality's debtors book;
- The increased cost of electricity (due to tariff increases as approved by NERSA);
- Wage increases for municipal staff that continues to exceed consumer inflation, as well
 as the need to fill critical vacancies to augment basic service delivery;
- The lack of affordable capital/borrowing;

^{***} Detailed tariff list is attached as Annexure F.

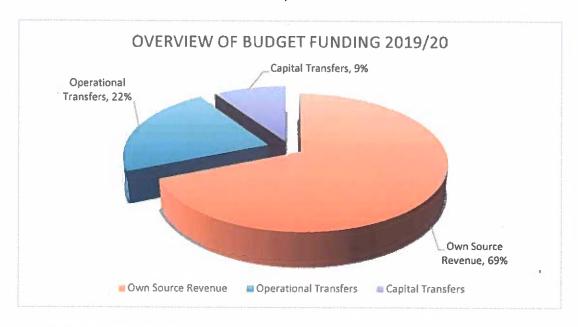

6. Overview of Budget Funding

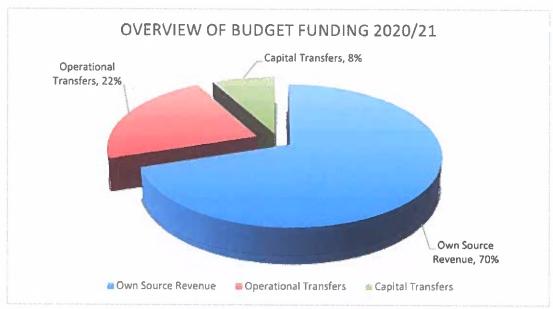

In line with Section 18 (1) of the MFMA which states that an annual budget may only be funded from:

- ✓ Realistically anticipated revenues to be collected;
- ✓ Cash backed accumulated funds from the previous years' surpluses not committed for other purposes; and
- ✓ Borrowed funds, but only for the capital budget referred to in Section 17.

The importance of tabling funded budgets is highlighted in MFMA Circular No. 74.

The achievement of this requirement in totality effectively means that the Council has "Balanced" its annual budget by ensuring that budgeted outflows will be offset by a combination of planned inflows. Refer to Table A7 Budgeted Cash Flows and Table A8 Cash backed reserves/accumulated surplus reconciliation.

The Municipality continues to experience an unfavourable financial profile and low liquidity levels, which is mainly attributable to:

- The high outstanding debtors' book which continues to increase on an annual basis due to non-payment of services by consumers,
- The municipality operates within its annual budget, as approved by Council.
- The municipality maintains a minimal cash to fund operations in effecting service delivery.

In compliance with relevant statutory requirements, the Financial Plan (Medium Term Revenue and Expenditure Framework-MTREF) is reviewed and updated annually.

The Capital budget is mainly funded by the allocations (grants) received by the municipality from National and Provincial Government in the form of grants, as well as public contributions and donations, borrowings and internally generated funds.

The municipality raises revenue from a basket of differential tariff increases determined in the most acceptable and equitable funding regime taking into consideration the actual cost of delivering services, budget priorities and national legislation, regulations and policy guidelines. The municipal revenue comprises of operating revenue which includes property taxes, services charges and operating grants- and capital revenue which consists of capital grants, borrowings, cash reserves and operating surplus.

This high level of independent and relative stable income sources of revenue is one of the key factors that support the sound financial position of the municipality. In addition to the obvious need to grow the municipality's revenue by increasing its tax base, other means for securing funding for Council projects need to be explored in a variety of ways. The municipality faces unpleasant choices in attempting to finance the projected levels of investment in infrastructure. Sources of capital finance are already stretched with limited scope for further borrowing, consumer pressure to restrict tariff and tax increases, and little likelihood of a structural upward adjustment in grant allocations. Further, efficiencies in the borrowing programme will continue to be sought to lock in lower cost and longer-term borrowing, plus the introduction of new revenue sources such as infrastructure contribution and charges.

7. Operating Revenue Framework

The municipality generates income from various sources such as exchange and non-exchange transactions. Revenue from exchange transactions is generated mainly from trading services. The municipality has adopted a consolidated billing system for both exchange and non-exchange transactions for municipal services. Billing is therefore done systematically based on fixed monthly tariffs for other services as well as consumption-based billing for metered services.

For Moqhaka Local Municipality to continue improving the quality of basic services provided to its citizens it needs to generate the required level of revenue and improve its debt collection rate. In these tough economic times strong revenue management is fundamental to the financial sustainability of every municipality. The reality is that we are faced with development backlogs and high poverty and unemployment rate in our area.

The expenditure required to address these challenges will inevitably always exceed available funding, taking into account the subsidies that the municipality needs to provide to the poor, hence difficult choices have to be made in relation to tariff increases and balancing expenditures against realistically anticipated revenues.

7.1 The municipality's revenue strategy is built around the following key components:

- National Treasury's guidelines and macro-economic policy;
- Projected growth and growth in demand for services;
- Realistic projections of revenue and collection thereof, as well as strategies for debtor's management;
- Improving the effectiveness of revenue management processes and procedures;
- Efficient revenue management, which aims to ensure a <u>95%</u> annual collection rate for property rates and service charges as required by MFMA Circular No. 71;
- Electricity tariff increases as approved by the National Electricity Regulator of South Africa (NERSA);
- Achievement of <u>full cost recovery</u> of specific user charges especially in relation to trading services;
- Paying special attention to cost containment measures by, amongst other things, controlling unnecessary spending on nice-to-have items and non-essential activities as was highlighted in MFMA Circular No.82;
- Determination of tariffs for trading services in a cost reflective and a cost recovery manner;
- Determining the tariff escalation rate by establishing/calculating the revenue requirement of each service in order to achieve cost reflective tariffs (or Break-Even-Point);
- The municipality's Property Rates Policy approved by Council in terms of the Municipal Property Rates Act, 2004 (Act 6 of 2004) (MPRA);
- The municipality's Indigent Policy and the rendering of free basic services; and
- Curbing consumption of water and electricity by indigents to ensure that they do not exceed their allocated benefits.

The financial sustainability of the 2020/21 MTREF is largely dependent on the collection of the anticipated revenue. Provision is made in the budget for a collection rate of 85%. To achieve this collection, Moqhaka Local Municipality is looking to implement more robust credit and debt control measures, which will ensure that all consumers who can afford to pay for services rendered do pay for those services and those who cannot afford to pay for the services are registered accordingly as indigents in terms of the municipality's indigent policy. This rate is in relation to the 2020/21 financial year revenue collection and does not take into account the collection efforts of the municipality with regards to its arrear consumer debt.

In terms of Council's social commitment to assist the poor households within Moqhaka the supply of free basic services and social contributions to identified structures in Moqhaka remains a priority in order to ensure basic service delivery.

In view of the aforementioned, the following table provides a consolidated overview of the proposed Medium-term Revenue and Expenditure Framework:

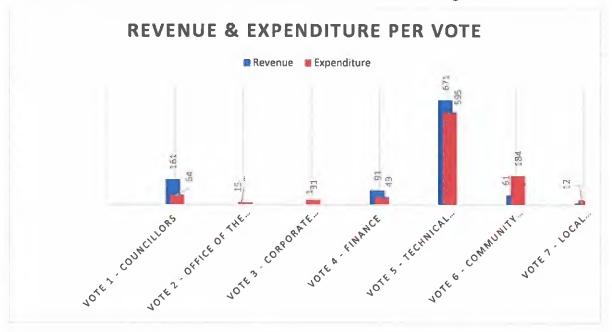

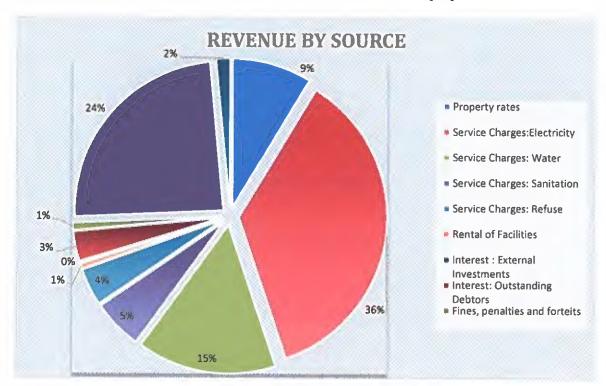

Table 2 Summary of revenue classified by municipal votes (A3)

Vote Description			2020/21 MTREF	
R thousand	Special Adjustment Budget 2019/20	Budget year 2020/21	Budget year 2021/22	Budget Year 2022/23
Revenue by Vote				
Vote 1 - Councillors	149 644	161 243	168 983	177 094
Vote 2 - Office of the municipal manager	-	-	-	_
Vote 3 - Corporate Services	863	804	842	883
Vota 4 - Finance	87 372	90 936	95 300	99 875
Vote 5 - Technical Services	625 274	670 947	703 152	736 904
Vote 6 - Community and Emergency Services	54 582	60 900	63 823	66 887
Vote 7 - Local Economic Development and Planning	14 604	11 833	12 401	12 996
Total Revenue by Vote	932 339	996 662	1 044 502	1 094 638

The following table is a summary of the MTREF classified by main revenue source

Table 3 Summary of revenue classified by main revenue source (A4)

Revenue types					
R thousand	Special Adjustment Budget Year 2019/20	Budget Year 2020/21	%	Revenue Composition	
Property rates	76 515	80 720	5%	9%	
Service Charges:Electricity	310 408	337 597	9%	36%	
Service Charges: Water	131 057	141 715	8%	15%	
Service Charges: Sanitation	46 925	50 701	8%	5%	
Service Charges: Refuse	34 610	37 736	9%	4%	
Rental of Facilities	8 003	4 769	-40%	1%	
Interest : External investments	1 795	1 883	5%	0%	
Interest: Outstanding Debtors	28 573	30 285	6%	3%	
Fines, penalties and forteits	8 105	7 426	-8%	1%	
Transfers Recognised Operational	209 441	225 857	8%	24%	
Other Revenue	14 361	14 038	-2%	2%	
Total Revenue (Excluding capital grants)	869 795	932 728	7%	100%	

In line with the formats prescribed by the Municipal Budget and Reporting Regulations, capital transfers and contributions are excluded from the operating statement, as inclusion of these revenue sources would distort the calculated operating surplus/deficit.

Revenue generated from **rates and service charges** comprise a significant percentage (70%) of the revenue basket for the Municipality. Rates and service charge revenues comprise more than two thirds of the total revenue mix. In the 2020/21 financial year, revenue from rates and services charges amounted to **R648** million. This effectively means that the municipality is highly dependent on its consumers/households/community to pay for the services rendered in order to enable the municipality to continue rendering these basic services consistently so. The municipal funding composition is outlined in section 6 of this document.

TARIFFS INCREASE REMARKS

Water

Revenues from water services increased on average by **9.8%.** The municipality continue to experience major challenges with regards to its water network, which in most cases leaves the community without water for extended period of times. The water network is still predominantly asbestos pipelines. This continues to adversely affect our water distribution infrastructure due to continuous burst pipes, especially during the winter season due to the type of network in place (asbestos pipes).

The repairs and maintenance cost for the network is funding from the "basic water charge" tariff. It has been evident from the past 3 years that this tariff does not adequately cover the costs of effectively maintaining the water network. This tariff continues to experience a higher tariff increase to ensure that adequate financial resources is available for the rehabilitation of the water infrastructure network.

The developments which the municipality undertook in the last 3 years has seen quite a high demand in terms of the water supply. Which conversely, puts pressure on the municipality to ensure that water is supplied accordingly to all residents within its Jurisdiction. The lack of adequate number of reservoirs still remain a huge challenge for the municipality in ensuring that its residents have water at all times.

Sanitation

Revenues from sanitation services increased on average by **8.5%**. The municipality continue to experience serious challenges with regards to its sanitation network. The network is a clay pipe network and is aged, while at the same time the municipality is experiencing continuous collapse lines which is very costly to the municipality to upkeep and maintain. These clay pipes most of the time results in sewer blockages due to the aging thereof, which also exacerbate the repairs and maintenance costs relating to the sanitation infrastructure network.

The repairs and maintenance cost for the network are mainly funded from the "basic sanitation charge" tariff. It has been evident from the past 3 years that this tariff is not adequate to cover the costs of effectively maintaining the sanitation network. This tariff will experience a higher tariff increase to ensure that adequate funding is available for the rehabilitation of the sanitation infrastructure network.

REFUSE

Revenues from Solid Waste Management increased on average by 8.1%. The increased tariff is based on the costs of delivering the respective service. This is a progressive increase in ensuring that the tariffs are cost reflective, and that the division results in financial sustainability.

It was also determined by the municipality that one of the contributors to the Solid Waste expenditure relates to the excessive time spent (which leads to overtime been worked in most cases) collecting refuse that is kept in containers which does not comply with the required specifications as outlined in the Provincial Gazette of 13 March 2015,

which defines a "bin" as follows;

"bin - means a standard type of refuse bin with a capacity of 0.1 cubic meters or 85 litres as approved by the Municipality and which can be supplied by the Municipality. The bin may be

constructed of galvanised iron, rubber or polythene;

<u>bin liner</u>-means a plastic bag approved by the Municipality which is placed inside a bin with a maximum capacity of 0.1 cubic meters. These bags must be of a dark colour, 950 mm x 750 mm in size, of low density minimum 40 micrometer diameter or 20 micrometer diameter high density;"

It is against this background that the municipality cannot continue to collect refuse that is not kept in acceptable containers as indicated above. (it should also be noted that any refuse placed in mealie bags, the bags will not be returned only the refuse bins will be returned).

<u>OTHER REVENUE</u>

Other revenue component increased on average by 11%. This was as a result of the alignment of the costs involved in rendering these services, so as to ensure that the municipality does not run these services at a loss which will ultimately affect the municipality's going concern.

Other revenue comprises of various items such as income received from building plan fees, connection fees, rental of properties and advertisement fees. The departments are continuously reviewing the tariffs relating to these services on an annual basis to ensure they are cost reflective, market related and financially sustainable. This will also enable the municipality to have sufficient resources to affect the necessary repairs and maintenance to keep the properties on a good condition.

8. OPERATING TRANSFERS AND GRANT RECEIPTS

The Operating grants and transfers amounted to **R209** million in the 2019/20 financial year and the grants increased to **R225** million for the 2020/21 financial year. This is mainly because of the increase in the municipal equitable share allocation for the new financial year.

9. Operating Expenditure Framework

The Municipality's expenditure framework for the 2020/21 budget and MTREF is informed by the following:

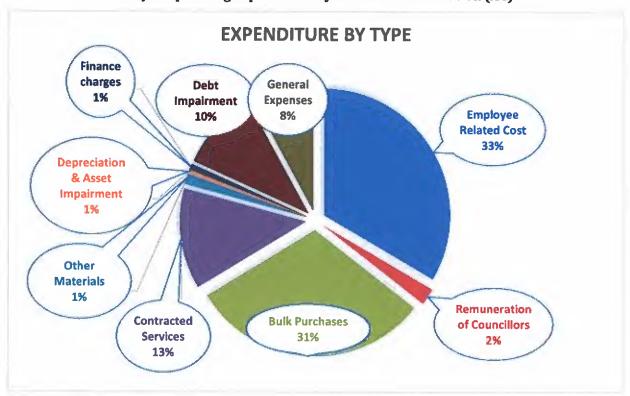

- The asset renewal strategy and the repairs and maintenance plan;
- Balanced budget constraint (operating expenditure should not exceed operating revenue) unless there are existing uncommitted cash-backed reserves to fund any deficit;
- Funding of the budget over the medium-term as informed by Section 18 and 19 of the MFMA;
- The capital programme is aligned to the asset renewal strategy and backlog eradication plan;
- Operational gains and efficiencies will be directed to funding the capital budget and other core services; and
- Strict adherence to the principle of no project plans no budget. If there is no business plan no funding allocation can be made.

Table 5 Summary of operating expenditure by municipal votes (A3)

Vote Description		2020/21 MTREF				
R thousand	Special Adjustment Budget 2019/20	Budget year 2020/21	Budget year 2021/22	Budget Year 2022/23

General Expenses	65 820	73 156	11%	8%
Total Expenditure (Excluding capital grants)	855 911	914 370	7%	100%

REMARKS

The budgeted allocation for <u>employee related costs</u> for the 2020/21 financial year amounts to R307 million, which equates to 33% of the total operating expenditure. The employee increase percentage is within the threshold as stipulated in the MFMA Circular No. 71.

The cost associated with the <u>remuneration of councillors</u> is determined by the Minister of Cooperative Governance and Traditional Affairs in accordance with <u>the Remuneration of Public</u> <u>Office Bearers Act, 1998 (Act 20 of 1998)</u>. The most recent proclamation in this regard has been taken into account in compiling the respective budget.

The cost associated with the remuneration of the municipality's senior managers is determined by the Minister of Co-operative Governance and Traditional Affairs in accordance with the Local Government: Upper Limits of Total Remuneration Packages payable to Municipal Managers and Managers directly accountable to Municipal Manager. The most recent proclamation in this regard has been taken into account in compiling the respective budget.

<u>Bulk purchases</u> are directly informed by the purchase of electricity from Eskom. The annual price increases as approved by NERSA (National Energy Regulator of South Africa) have been factored at <u>6.9%</u> into the budget appropriation and directly inform the revenue provisions. The expenditure also incorporates the reticulation losses.

The <u>Contracted Services</u> encompasses overall the repairs and maintenance of amongst others; buildings, vehicles, equipment, gardens and traffic and streetlights, gardening services, vending costs and security costs. The 13% increase is mainly to cater for the necessary repairs to the infrastructure network to ensure sustainable supply.

The <u>Other materials</u> mainly relates to stores consumables which is used in the rendering of services to the community at large. This includes; chemicals water and electricity meters, office materials, oil and electricity materials.

Provision for <u>depreciation and asset impairment</u> is been faced in over the financial years due to its excessive impact on the revenue tariffs, to provide for the asset renewal as a result of use over the years in line with GRAP 17. The increase of 51% is still insignificant given the amount required for network maintenance and repairs, even with regards to the actual expenditure outcome.

<u>Finance charges</u> consist primarily of the repayment of interest on long-term borrowing (cost of capital). The municipality is currently servicing the DBSA loan.

The provision of <u>debt impairment</u> was determined based on an annual collection rate of 85%. While this expenditure is considered to be a non-cash flow item, it informs the total costs associated with rendering the services of the municipality, as well as the municipality's realistically anticipated revenues. The debt impairment provision was also increased taking into account the current outstanding municipal debt.

11. Capital expenditure

The following table provides a breakdown of budgeted capital expenditure by Council vote.

REMARKS ON THE CASHFLOW

The cash flows have been projected on the various revenue streams based on the actual collection rate of the revenue streams.

Revenue Description	Collection Rate						
Property Rates	90%						
Electricity revenue	95%						
Water revenue	80%						
Sanitation revenue	80%						
Refuse revenue	80%						
Operating & Capital grants	100%						
Other Income	80%						
Average Collection	86%						

The municipality has also made provision to meet **95%** of its overall Operational obligations. This provision is to be reviewed during the adjustment budget process depending on the availability of additional revenues and **100%** of the Capital commitments. The <u>5%</u> variance between the revenue collection and the expenditure, will be subsidised through the additional revenue enhancement mechanisms and the collection of outstanding debt.

Collections from Arrear Debtors

The municipality's debtors book amounted to R 780m as at 30 April 2020. The municipality plans to collect at least 20% (R156m) of its arrear debt in order to fund the <u>outstanding creditors</u> and other operational requirements during the budget year.

In facilitating the collection of arrear debtors, the municipality upgraded its electricity vending system to the one which enables it to collect 40% of all electricity purchases in relation to those consumers whose accounts are in arrears. The outstanding consumer debt relating to Rammulotsi (30 April 2020 R275m – 35% of outstanding debt) and Matiwangtiwang (30 April 2020 R29m – 4% of outstanding debt) continues to soar, mainly as a result of the municipality's inability to effectively implement debt collection mechanisms, as these areas are service by Eskom in terms of electricity supply.

The municipality owes Eskom R350m as at the preparation of the Annual Budget 2020/21. The municipality signed a payment arrangement with Eskom to settle this outstanding debt. The repayments relating to the current account are already provided for within the annual budget. This outstanding debt continue to decline very slowly given the fact that the municipality is still cross-subsidising other services to ensure effective service delivery.

The municipality continue to target the reduction of the reticulation losses for both water and electricity which were as follows; Water amounted to R18m (2018 R20m) & Electricity at R44m (2018 R 47) – as per the <u>Audited Annual Financial Statements of 30 June 2019</u> through its continuous program of water and electricity meter replacements. To effectively carry out this task, the municipality sourced the services of private contractors to speed up the replacement of faulty water and electricity meters.

13. Long term borrowing

The municipality has not obtained any new long-term borrowings in the current financial year.

The table below indicates the balances as at 30 April 2020 and the projections for the current and the next MTREF.

14. Performance Management

The municipality has adopted a Performance Management System (PMS). The PMS requires that the Municipal Manager and all Senior Managers accountable to the Municipal Manager sign performance agreements annually in line with the IDP Review, the Budget and the Service Delivery and Budget Implementation Plan (SDBIP).

It is further expected that Senior Managers enter into performance contracts with the Divisional Managers (Managers reporting to Senior Managers). The performance system is cascaded down to the entry level in the organisation.

The Municipal Manager, Senior Managers and divisional heads are evaluated against the Key Performance Indicators and the job description for each incumbent.

The performance contracts of Municipal Manager and Senior Managers include performance bonus, this is budgeted for, even though performance bonuses were never paid before.

All divisional heads, in the same manner as the Senior Managers and the Municipal Manager sign annual performance agreements and must be assessed accordingly. Monthly and quarterly reporting performance is compulsory with quarterly performance reports submitted to the Internal Audit for verification purposes, and the Executive Mayor submitting these to Council within 30 days after the end of the quarter.
